# Running IBM Lotus Domino on VMware Or “We want to virtualize *absolutely everything*”

Webinar Version 1.0

Darren Duke, Technical Lead, STS

Java • Lotus Domino • .NET • SQL • BlackBerry

# About me – my fav slide

- Domino consultant for over a decade
- Domino, VMware and BlackBerry certified
- <http://blog.darrenduke.net>
- <http://www.ThisWeekInLotus.com>
- <http://www.TipsInTwo.com>
- @darrenduke on Twitter
- Oddles of DAOS and VMware experience

# Why the webinar?

- Many, many failed VMware attempts by Domino customers on their own
- SAN comments at Gurupalooza (LS10)
  - <http://blog.darrenduke.net/Darren/DDBZ.nsf/dx/san-san-san-gurupalooza-and-domino.htm>
- Domino is just click and go.....
  - Ahem
- Hardware resellers don't know applications
  - “Oh, sure VMware can do that!”

## Recap of the “other stuff”

- Now, why are you virtualizing?
- Never share LUNs with Domino
  - 6 to 7 LUNs
- Separate everything!
- DRS is not always a good idea
- Never allow RAM to balloon
- Verify everything your SAN admin tells you

# LUNs – just to be clear

- One each for:
  - OS\*
  - Applications\*
  - Domino TX logging (?)
  - OS Page file
  - DAOS repository
  - Domino view rebuild
  - Domino Data

# We are here to help – and cheap!

- For further information contact or to schedule services
  - Lisa Duke, [lisa.duke@simplified-tech.com](mailto:lisa.duke@simplified-tech.com) or 678 378 4278
  - Ernie Sutter, [ernie.sutter@simplified-tech.com](mailto:ernie.sutter@simplified-tech.com) or 404 931 5786
- Lots more information on the STS web site and blog:
